Abstract. This text, formatted as a scientific article, aims to present the new SBC paper template, describing its main features and explaining how it should be used. This version, more specifically, should be used exclusively for articles written in Portuguese that will be published in any event proceeding series at SBC OpenLib. The abstract in Portuguese, as you can see in this example, must be before the abstract in English and must have between 500 and 750 words.

3 Systematic Reviews

Systematic Reviews.

3.1 What Is Eligibility Criteria In A Systematic Review?

Source: <https://www.distillersr.com/resources/systematic-literature-reviews/eligibility-criteria-in-a-systematic-review>

Eligibility criteria is a pre-specified, unambiguous basis that determines the scope of studies to be synthesized in a systematic review. The eligibility criteria can be developed newly by the authors, or it can be adopted from another review. In the second scenario, the original authors must be referenced. It guides the selection of literature during the search in databases or other sources. During title, abstract or full-text reading, or potential articles, the criteria dictates what must be included (inclusion criteria), and excluded (exclusion criteria) in the review. These are a fundamental prerequisite of all systematic review methods and are often recorded as a paragraph, or table within the methodology section of the final report.

Eligibility criteria are defined after setting the research question, and study objective(s), and before data collection. However, scoping searches may be performed beforehand to better establish them.

Declarations

Acknowledgements

THIS DECLARATION IS OPTIONAL. This is a multiline text of acknowledgments. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat.

Funding

THIS DECLARATION IS OPTIONAL. This research was funded by lorem ipsum dolor sit amet, consectetur adipiscing elit.

Authors' Contributions

THIS DECLARATION IS MANDATORY. Consider the SBC Code of Conduct. Participation in authorship: All authors of a published work or submitted for publication are expected to have actively participated in the respective work. We suggest that authors describe their contribution using the CRediT Taxonomy (<https://credit.niso.org/>) as in this example: JV contributed to the design of this study. CB, RP, and CM performed the experiments. JV is the primary contributor and writer of this manuscript. All authors read and approved the final manuscript.

Competing interests

THIS DECLARATION IS MANDATORY. If there are no competing interests, the authors should declare: “The authors declare that they have no competing interests”. Otherwise, the declaration should be: “The authors declare that they have the following competing interests, lorem ipsum dolor sit amet, consectetur adipiscing elit.”

Availability of research artifacts

THIS DECLARATION IS MANDATORY. Consider the SBC Code of Conduct. Reproducibility of research results: Where applicable, it is recommended that articles indicate the public availability of material used in the reviews, to facilitate the reproduction of the respective results by other researchers. If the authors have made their data and/or code publicly available, the statement should read: “The data and other materials created and/or used in this literature review are available at ...”. Otherwise, the statement should read: “The data and other materials created and/or used in this literature review will be made available upon request”. All supplementary material made publicly available by the authors will appear on the article’s publication page if accepted.

Use of Artificial Intelligence

THIS DECLARATION IS MANDATORY. Consider the SBC Code of Conduct. Use of Generative Artificial Intelligence (AI): The use of generative AI tools and technologies for content generation, in writing and/or reviewing the content of articles, must be explicitly declared in the paper. The declaration should appear in this section, specifically defined for this purpose. The tools (and their versions) should be listed and where they were used, for example, texts, tables, graphs, citations, etc. These tools **may not** be listed as authors of an article. The use of such tools does not exempt the authors from responsibility for all of their content, including if plagiarism is identified. If the authors did not use such tools, the statement should be: “The authors did not use generative AI tools in the development of the study.”

Further relevant information

Manuscripts must explicitly indicate how the ethical issues of the research were addressed and managed, including the research approval by an ethics committee when applicable.
